

PRATAP GURAV

New York, NY (Open to relocation across the U.S.) | pbg8757@nyu.edu | +1 (929) 757-0479 | [linkedin.com/in/pratapgurav](https://www.linkedin.com/in/pratapgurav)

Results-driven project manager with 2+ years delivering \$1.7M+ in cost savings across global programs spanning six countries. Engineer by training, strategist by practice; built at the intersection of AI-informed workflow design, technical rigor, and enterprise value creation. Experienced in cross-functional transformation and executive stakeholder communication.

EDUCATION

New York University - Master's in Management of Technology (MOT) (Aug 2025 - May 2027)

Coursework: Global Innovation, Data Viz for Business Managers, Organizational Behavior, Design Strategies, Marketing, Finance/Economics.

Institute of Chemical Technology, Mumbai - Master's in Chemical Engineering (Integrated) (Jul 2018 - Jun 2023)

Coursework: Project Management & Economics, Process Development & Simulation, Industrial Engineering, Energy Engg.

Leadership: Head of the University Football Club. & Head of Dance and Drama Club

WORK EXPERIENCE

HENKEL

Product Development Technician - Project Manager (Jan 2024 - Jul 2025)

- Managed 10+ concurrent programs across a \$1.5M+ cost reduction portfolio; designed future-state workflows for raw material sourcing across 6 countries, aligning supplier risk, performance specs, and project economics to deliver measurable value.
- Managed the ASC global corporate newsletter for product and technology communication to 2,000+ stakeholders across 6+ countries, increasing awareness by 50% and accelerating project pipeline momentum.
- Performed demand forecasting, inventory analysis, and supply planning using data analytics, KPIs, and dashboards to support S&OP, capacity planning, and data-driven decision-making.
- Collaborated with cross-functional leaders to redesign and deploy 20+ compliance workflows (ISO 9001), integrating AI governance principles to achieve 100% first-time audit success and accelerate go-to-market execution across business units.

IVP Ltd.

Assistant Project Manager - Research & Development Dept. (Sep 2023 - Dec 2023)

- Led full-cycle delivery of the Foundry Adhesives initiative; completed 40% ahead of schedule, including cost optimization work that reduced formulation spend by \$200K+ while maintaining performance criteria and go-to-market readiness.
- Streamlined R&D documentation and compliance processes by leading collaboration on ISO 9001, 14001, and 45001 audits, achieving 100% audit readiness, strengthening regulatory adherence, and obtaining go-to-market approvals.

Technip Energies

Process Engineering Intern (Jul 2022 - Oct 2022)

- Orchestrated end-to-end heat exchanger optimization and hydrocarbon vessel design, achieving 97% capacity match, 90% operational accuracy, and significantly enhancing safety compliance while aligning cross-functional teams.
- Drove process documentation (PFDs, P&IDs), improving stakeholder alignment, reducing rework, and optimizing project execution.

Process Modelling of Polyurethane Production from Mahua Oil (Final Year Project) (Oct 2022 - May 2023)

- Developed financial models and transformation roadmap for a \$12M greenfield bio-based production facility using Aspen Plus; achieved 91% reduction in utility costs through zero-based process redesign and capital efficiency analysis.
- Developed Mahua oil as a sustainable raw material, optimizing production processes through cross-functional collaboration.

LeaseGuard | AI Voice Agent (GDG NYC Hackathon, NYU Tandon) (April 2026)

- Built a multilingual agentic AI voice-text agent to help NYC renters assess building safety using live HPD violations, 311 complaints, and building registration data; architected the end-to-end agentic workflow and defined MVP scope.
- Led cross-functional execution across a 4-person team, delivering a working AI-native prototype that demonstrated the feasibility of agentic automation for real-world civic data access at scale.

SKILLS

AI & Transformation: GenAI Applications, Agentic Workflow Design, AI Governance, AI Prompt Engineering, MVP Experimentation, Operating Model Design, Workflow Redesign

Strategy & Value Creation: Enterprise Roadmapping, Financial Modeling, ROI Analysis, Budgeting & Cost Management, Market Analysis, Product Lifecycle Management, Stakeholder Management

Program & Project Execution: Agile, Waterfall, Jira, MS Project, Risk Identification & Mitigation, Cross-functional Leadership, Program Roadmapping

Data & Tools: Python, Power BI, Excel, Aspen Plus, MATLAB, Think-Cell, Data Visualization, Product Metrics & KPIs
