

PRATAP GURAV

New York, NY (Open to relocation across the U.S.) | pbg8757@nyu.edu | +1 (929) 757-0479 | [linkedin.com/in/pratapgurav](https://www.linkedin.com/in/pratapgurav)

Technical Project Manager with 2+ years leading cross-functional programs delivering \$1.7M+ in cost savings through data-driven planning, KPI development, and stakeholder alignment. Engineer by training, Manager by design. Targeting project/program management, technical operations, and cross-functional execution across energy, industrial, and technology sectors.

EDUCATION

New York University - Master's in Management of Technology (MOT) (Aug 2025 - May 2027)

Coursework: Global Innovation, Data Viz for Business Managers, Organizational Behavior, Design Strategies, Marketing, Finance/Economics.

Institute of Chemical Technology, Mumbai - Master's in Chemical Engineering (Integrated) (Jul 2018 - Jun 2023)

Coursework: Project Management & Economics, Process Development & Simulation, Industrial Engineering, Energy Engg.

Leadership: Head of the University Football Club. & Head of Dance and Drama Club

WORK EXPERIENCE

HENKEL

Product Development Technician - Project Manager (Jan 2024 - Jul 2025)

- Managed 10+ concurrent projects across a \$1.5M+ annual cost reduction portfolio, developing should-cost models and BOM-level cost breakdowns to drive sourcing decisions, balance supplier risk, and track execution targets across 6 countries.
- Defined program objectives and provided structured status updates to 2,000+ internal customers across 6+ countries, increasing stakeholder awareness by 50% and accelerating project pipeline momentum.
- Defined and tracked product KPIs and user engagement metrics using Power BI dashboards, translating data insights into actionable recommendations for cross-functional stakeholders.
- Drove deployment of 20+ ISO 9001 compliance frameworks across engineering, supply chain, and operations, achieving 100% first-time audit success by working directly with end users to ensure process adoption and workflow compliance.

IVP Ltd.

Assistant Project Manager - Research & Development Dept. (Sep 2023 - Dec 2023)

- Led full-cycle delivery of the Foundry Adhesives initiative from conception through implementation, developing the project plan, managing schedule and task details, and identifying \$200K+ in cost reductions while delivering 40% ahead of time in budget.
- Streamlined R&D documentation and compliance processes by leading collaboration on ISO 9001, 14001, and 45001 audits, achieving 100% audit readiness, strengthening regulatory adherence, and obtaining go-to-market approvals.

Technip Energies

Process Engineering Intern (Jul 2022 - Oct 2022)

- Orchestrated end-to-end heat exchanger optimization and hydrocarbon vessel design, achieving 97% capacity match, 90% operational accuracy, and significantly enhancing safety compliance while aligning cross-functional teams.
- Drove process documentation (PFDs, P&IDs), improving stakeholder alignment, reducing rework, and optimizing project execution.

LeaseGuard | AI Voice Agent (GDG NYC Hackathon, NYU Tandon) (April 2026)

- Built a multilingual agentic AI voice-text agent to help NYC renters assess building safety using live HPD violations, 311 complaints, and building registration data; architected the end-to-end agentic workflow and defined MVP scope.
- Led cross-functional execution across a 4-person team, delivering a working AI-native prototype that demonstrated the feasibility of agentic automation for real-world civic data access at scale.

Process Modelling of Polyurethane Production from Mahua Oil (Final Year Project) (Oct 2022 - May 2023)

- Modeled bio-based polyurethane production on a \$12M greenfield project using Aspen Plus, driving a 91% reduction in utility costs via should-cost analysis, capital efficiency modeling, and cross-functional collaboration on sustainable RM development.

SKILLS

Project Management: Agile, Waterfall, Jira, MS Project, Notion, Gantt Charts, Milestone Tracking, Should-Cost Modeling, Cost Opportunity Tracking, BOM Analysis, Risk Identification, Complication Resolution & Mitigation, Internal Customer Management, Stakeholder Management, Program Roadmapping, Budgeting & Cost Management, Vendor & Partner Management, Project Planning, Market Analysis, and AI Prompt Engineering, Product Metrics & KPIs.

Energy & Technical: Energy Systems, Capital Project Delivery, Advanced Manufacturing, Aspen Plus, ISO 9001/14001/45001, Regulatory Compliance, Safety Management, and Technical Design.

Data & Tools: Python, Power BI, MATLAB, Excel, Think-Cell, Data Visualization, Tableau, AI Workflow Design.

Strategy & Leadership: Stakeholder Communication, Go-to-Market Execution, Design for Manufacturability (DFM).
